

# JASA 2-in-1 Pack™

**JASA 2-in-1 Pack™** two products packed separately in one pack.

**JASA 2-in-1 Pack™**  
pack two products clean and separate at the same time

## The JASA 2-in-1 Pack™ can pack two products separately in one package in one production run.

Supermarkets experience a growing consumer demand for convenience products. The trend offers food producers, processors and packers the opportunity to bring innovative product concepts to the market.

The fruit and vegetable specialists at JASA Packaging Solutions developed an innovative package to meet this demand: the 2-in-1 Pack™. The patented and entirely automated packaging solution packs different products cleanly in two separate compartments in a single package, in one single production run. Mixed salad, potatoes or crisps go in the main

compartment, for example, while the second compartment offers room for sachets of dressing or herbs, a disposable knife or fork or promotional items. An innovative and cost efficient packaging concept that offers packers countless opportunities to meet the growing demand for ready-to-eat products.

## LONGER SHELF LIFE BY PREVENTING PRODUCTS BEING CONTAMINATED

As soon as different products are added in a package, bacterial contamination or flavour, smell and colour transmission can take place. This effect on each other is prevented by the 2-in-1 Pack™. The products are packed in bacteriologically separate compartments. Different atmospheric gases can be added to each compartment. An intelligent and compact total solution for a longer shelf life and the preservation of flavour, smell and colour.

## FAST, CLEAN AND CERTAIN

Both compartments of the 2-in-1 Pack™ are formed, filled and sealed in one, fully automatic production run. As a result: significant quick wins in production time, hygiene and cost control. Sachets, separate flavourings or savings campaign items are packed cleanly and safely in the second compartment. This brings an end to packaging where glued or taped-on sachets fall off or get lost in transport or on supermarket shelves.

## DISTINCTIVE CONCEPT

The consumers' increasing demand for convenience products challenges producers and packers to develop innovative and distinctive product concepts. JASA's flexible 2-in-1 Pack™ offers you the opportunity to meet consumer needs. Cost efficient and with optimum userfriendliness. Pack mixed salad or potatoes, for example, in the main compartment and sachets of dressing, herbs or croutons in the second compartment. Main and second compartments can be opened separately from each other: it is also possible to add an optional easyopening seal for extra convenience. This means that a complete salad or potato dish can be on the dining table in any household in no time.

## TWO TO FIVE COMPARTMENTS

JASA Packaging Solutions thinks ahead. We continue to develop our patented 2-in-1 Pack™ further so that up to five separate compartments can be formed, filled and sealed. Fully-automated, in one production run, with optional atmospheric gasses for shelf-life and compartments which can be opened separately from each other for optimum user-friendliness. A remarkable, cost-reducing alternative for the rigid compartment tray. If you would like to know more, get in touch with one of our packaging specialists. They will be happy to tell you more about the possibilities.

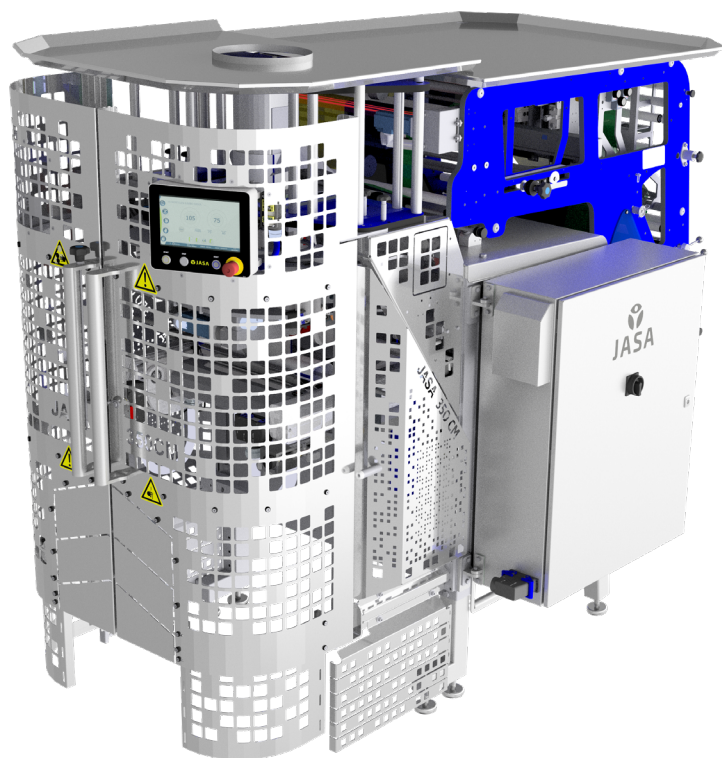

## EFFICIENT FOR EVERY SQUARE FOOT

We work efficiently with production space at JASA. Just one compact JASA packaging machine is sufficient for the production of several complex packaging varieties. Interchangeable format sets mean that you can work with the 2-in-1 Pack™ or flat-bottomed pouches and pillow bags on a vertical form, fill and seal machine. Productional flexibility and the optimum use of square meters are guaranteed.

**JASA Packaging Solutions** stands for innovation, quality and flexibility in packaging technology. We specialize in developing and manufacturing vertical packaging machines, sleeves and complete weighing and packaging lines. Producers and packers of all kinds of food products around the globe trust our expertise, for more than thirty years, 24/7.
